

Title: Report on Bad Designs in Everyday Life

Submitted by: Khushi Satyaprakash Singh

Course: Human Computer Interaction

Date: 23 July 2025

Aim: The Jugad

Objective:

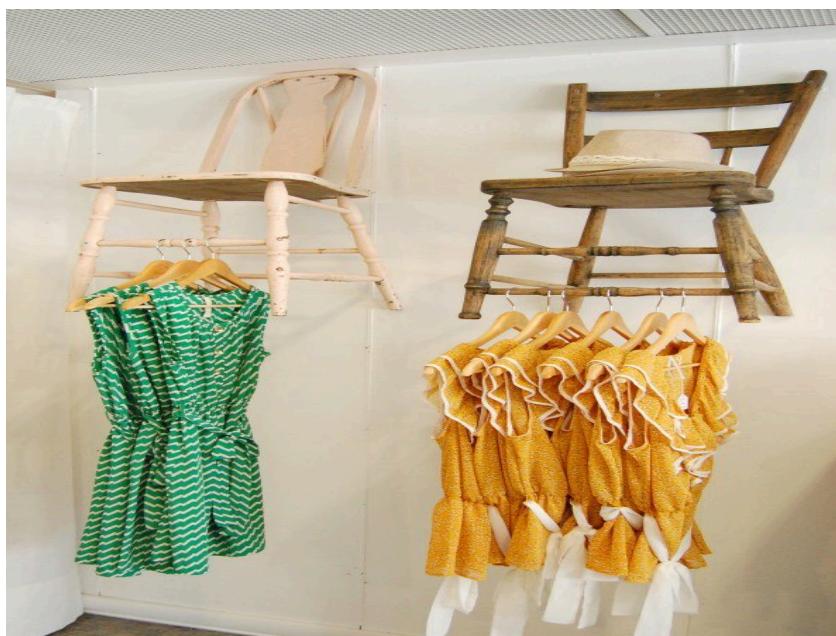

To identify and document innovative, creative uses of objects (jugad) in the surrounding environment that serve as temporary solutions using available resources.

Photographic Documentation of Jugaad

#### 1. Jugaad Example 1: Chair Used as Clothes Hanger

Description: A plastic chair with its backrest used to hang wet clothes in absence of a traditional drying rack.

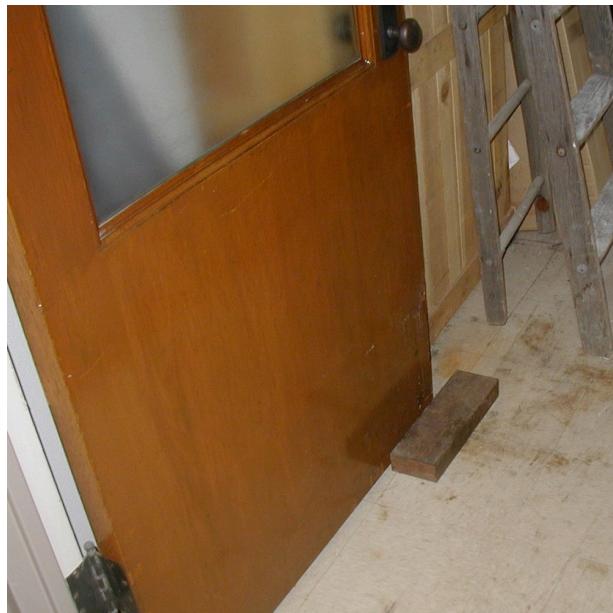

Jugaad Concept: The chair is not meant for drying clothes, but it is creatively used as a temporary stand.

## 2. Jugaad Example 2: Brick Used as Door Stopper

Description: A construction brick placed behind a door to prevent it from slamming shut due to wind.

Jugaad Concept: A brick, originally meant for building construction, is being used as a door stopper.

## 3. Jugaad Example 3: Bottle Used as Plant Drip Irrigation

Description: An old water bottle with a hole in its cap placed upside down in a flower pot for slow water release.

Jugaad Concept: A discarded plastic bottle is repurposed to maintain soil moisture.

#### 4. Jugaad Example 4: Mobile Holder Made from Binder Clips

Description: Two large binder clips and a rubber band used to make a mobile stand for hands-free use.

Jugaad Concept: Office supplies repurposed for tech convenience.

#### 5. Jugaad Example 5: Old Tyre Used as Garden Pot

Description: A used vehicle tyre painted and filled with soil to grow plants.

Jugaad Concept: Instead of disposing of the tyre, it is used creatively for planting.
